

INTRODUCTION TO SUPPLY CHAIN MANAGEMENT, MICROCREDENTIAL

The Saint Louis University microcredential in supply chain management is the management of a network of interconnected businesses involved in the provision of product and service packages required by the end customers in a supply chain. Supply chain management spans all movement and storage of raw materials, work-in-process inventory, and finished goods from the point of origin to the point of consumption. SCM draws heavily from the areas of operations management, logistics, procurement, and information technology while striving for an integrated approach. This SLU workshop brings into consideration the impact of supply chain management on the performance of the firm's financial results.

Admission Requirements

For current, active Saint Louis University students wishing to declare a microcredential, complete the Update for Student Curriculum Record form (<https://ask.slu.edu/TDClient/30/Portal/Requests/ServiceDet/?ID=160>).

For non-Saint Louis University students, click here to apply as a Visiting/ Non-Degree Seeking Student. (<https://www.slu.edu/admission/visiting-students.php>)
