

EDUCATION POLICY AND EQUITY PROGRAM

Saint Louis University's program in education policy and equity, designed to support critical inquiry into the nature of education policy and practice, provides an ideal environment for those who want to develop advanced skills as education researchers. Through an interdisciplinary course of study, students will develop a solid theoretical foundation and learn how to apply advanced research skills to the study of issues in education policy and practice from a social justice perspective.

Leadership

Kathryn Mitchell Pierce, Ph.D.

Program director

About the Faculty

Faculty members take a genuine interest in students, serve as strong role models of success and acquaint students with the challenges and joys of the profession. The faculty seeks an appropriate balance between theory and practice, between action and reflection, and between intellect and affect.
