MCH 5010 - Programs, Policy and Advocacy in Maternal and Child Health

3 Credits

Builds on MCH 5000 and other required courses. Focuses on application of assessment, program design and program evaluation skills to meet Maternal Child Health population needs domestically and internationally. Attention will be given to leadership skills including program management, policy analysis and advocacy for mothers, children and their families.

Prerequisite(s): MCH 5000; (EPI 5220 or EPI 5280^{*})

^{*} Concurrent enrollment allowed.

Attributes: MPH-Behavior Sci & Health Equi, MPH-Epidemiology, MPH-Global Health, MPH-Public Health Practice

MCH 5020 - Maternal Child Health Leadership Excellence and Development

3 Credits

This course will focus on building on students' experiences to broaden their understanding of public health and develop effective leadership and implementation science skills within this challenging and rewarding field of public health. The broad goal for this class is to further facilitate the process of students exploring and developing their own leadership needs through course content, classmates' leadership insights, and shadowing public health leaders in the field. Improvement of leadership skills in public health professionals, in turn, will increase the likelihood of population and community health improvement.

Attributes: MPH-Behavior Sci & Health Equi, MPH-Epidemiology, MPH-Global Health, MPH-Public Health Practice
